

For Immediate Release

ComputerEase Construction Software Enters the Most Innovative Products Contest at the 2010 World of Concrete Show

CINCINNATI, Ohio, November 13, 2009: ComputerEase Software, Inc., a leading provider of construction accounting and project management software, today announced that it has entered the 2010 Most Innovative Products (MIP) contest, which is part of the World of Concrete trade show to be held February 2-5, 2010 at the Las Vegas Convention Center in Las Vegas, Nevada. In the MIP contest showcase, ComputerEase will feature its FieldEase product, a cutting-edge remote data entry tool that turns manual, paper based processes into completely automated, paperless transactions.

FieldEase consists of a suite of tablet PC-based solutions that increase efficiency in the office and the field. Electronic Timesheets, one of the most vital applications within FieldEase, is highlighted in the ComputerEase MIP entry. Electronic Timesheets allow employee time and production quantities entered in the field to be electronically transferred to the ComputerEase accounting system at the contractor's home office. This extremely important ability provides more accurate job costing, while eliminating duplicate data entry.

The MIP contest showcases many of the products that will be exhibited at World of Concrete and gives attendees an opportunity to vote for the products they feel are the most innovative. "ComputerEase has built a solid reputation for delivering cutting edge solutions that are also easy to use," said ComputerEase president, John Meibers. "With FieldEase, contractors gain a user friendly suite of tools for improving job-to-office communications and increasing efficiency across their entire organization."

About ComputerEase

Founded in 1983, ComputerEase develops integrated construction accounting and project management software that helps contractors solve problems and increase profits. The scalable, modular structure of ComputerEase makes it the ideal fit for companies of all sizes and specialties. In addition to accounting and job costing, ComputerEase offers robust equipment, purchasing, service and electronic document management solutions. ComputerEase takes great pride in providing a matchless level of customer support. To accomplish this, the company has put industry professionals in key positions: 100% of the ComputerEase support, training and implementation staff has construction experience. More than 6,000 contractors across the U.S. use ComputerEase to streamline their operations and increase profits.
