# CONSTRUCTECH 50 HOTTEST 2009

ComputerEase Construction Software Named as ConstrucTech 50 Hottest
Local Company Wins Prestigious Software Award

ComputerEase, the leading provider of construction software has once again set the standard for industry innovation and customer-focused programming by being named as one of the 50 Hottest software providers in 2009 by ConstrucTech.

ConstrucTech magazine is a monthly industry publication devoted to examining the use of technology in construction. The annual competition focuses on superior innovation in construction software, functionality, usability, customer satisfaction and growth, as well as overall product upgrades and features.

ComputerEase software solutions are used by more than 20,000 active users in over 6,000 companies across North America. ComputerEase offers proven solutions for all aspects of the construction process, from estimating to purchasing to project management and billing.

"Throughout our history at ComputerEase we have always strived to be the innovator in construction software and winning this award again is a huge honor," said ComputerEase President John Meibers. "We have achieved that by being customer-focused through constant feedback from the end users who use the product on a daily basis."

Recently ComputerEase announced the release of ComputerEase Version 8.0, which boasts more than 170 new enhancements, features and new developments within the products' core modules which include the General Ledger, Accounts Payable, Accounts Receivable, Job Costing and Payroll. Enhancements can also be found within the Project Management, Equipment, Rental and Service Management modules.

The latest edition also includes upgrades to FieldEase, which extends much of the functionality of ComputerEase out into the field. Highlights of this new release include new purchase order functionality which is the first of its kind in construction software. The development of Field Ease on the tablet PC will allow service contractors to receive and process work orders in the field including entering time and labor-used through a variety of methods including electronic handwriting recognition.

About ComputerEase:

ComputerEase was founded in 1983 from a blended knowledge of accounting and construction to provide a construction management software solution that would improve the way contractors ran their businesses and met these unique construction accounting challenges. Since that time, ComputerEase Construction Software has grown to be the industry leader in providing innovative construction management and accounting solutions for contractors of all sizes.
