For Immediate Release

ComputerEase Construction Software Chooses Comdata as its Preferred Payment Solution Provider

Comdata's universally accepted MasterCard payment program will help ComputerEase users control costs and increase accounting efficiency.

CINCINNATI, Ohio, March 15, 2010: ComputerEase Software, Inc., a leading provider of construction accounting, project management and remote field-to-office software, today announced that it has chosen Comdata Corporation as its preferred payment solution provider. As a result, Comdata will make its MasterCard Program for Construction available to ComputerEase clients. The Comdata Program helps contractors manage spending and streamline accounts payable by combining purchasing activity across all spending categories or projects.

ComputerEase clients that take advantage of the Comdata MasterCard Program for Contractors can issue universally accepted and branded payment cards to select employees to consolidate and track the purchase of everything from fuel and vehicle maintenance to material purchases and office supplies. The cards can even be used for business travel and entertainment purposes. Benefits of the Program include:

- The ability to set custom spending limits and criteria on a per-card basis
- Real-time visibility of transaction history
- Online account management, with comprehensive business analytics
- Integration with the ComputerEase accounting system

In addition, Comdata offers a variety of incentive programs, such as discounted fuel at over 30,000 locations and a vendor payments rebate program. In the current economy, these cash-back programs can add up quickly to produce a positive impact on a contractor's cash flow.

"By partnering with ComputerEase, Comdata can offer their clients an industry standard solution for controlling costs," said Eric Newton, Vice President – Construction, for Comdata. "The integration between Comdata and ComputerEase will enable our mutual customers to process payments more effectively, which can have a direct impact on their bottom line."

"ComputerEase is always looking to partner with industry leading companies that add value to our clients' operations," said John Meibers, President of ComputerEase. "Comdata provides tools that are uniquely geared to the construction industry, and the improved visibility offered by their payment cards will provide our clients with the critical spending insight needed to control costs and improve efficiency."

ComputerEase clients who are interested in learning more about the Comdata MasterCard Program for Construction should contact Jack Ballman by phone at 800-544-2530 or by e-mail at
