FOR IMMEDIATE RELEASE

ComputerEase Launches New Expense Tracking App

New app, ExpenseEase adds functionality, integration with flagship product.

CINCINNATI, OH, December 12th – ComputerEase, the leading provider of accounting software for the construction industry, announces the release of a new mobile app for tracking expenses from the field. The new app, called ExpenseEase, is available in Google Play and the Apple App Store.

ExpenseEase integrates seamlessly with the ComputerEase construction accounting software. Once submitted, expense records appear automatically in the flagship software; resulting in accurate and timely job cost reporting. This functionality makes using ExpenseEase with ComputerEase faster and more efficient than any third-party expense tracking apps.

ExpenseEase allows users to enter expenses from the field on any iOS or Android device, including tablets and smartphones. Once entered, the user can then attach a photo of the corresponding receipt, and submit expenses instantly where they are stored securely within their ComputerEase system to be reviewed for payment.

“Our clients drive our product development and over the past couple of years we’ve had a tremendous number of requests for a mobile expense tracking solution. We are very excited to announce this addition to our flagship product. ExpenseEase simplifies the expense recording process and, best of all, keeps job cost reporting more accurate and more up-to-date,” says ComputerEase president John Meibers. “That, combined with the compatibility and integration with ComputerEase will save our clients time and money.”

Founded in 1983, ComputerEase develops integrated construction accounting, project management and field-to-office solutions that help contractors solve problems and increase profits. The scalability of ComputerEase makes it the ideal fit for construction companies of all sizes and trades. More than 6,000 contractors nationwide trust ComputerEase to work for their business.
