ComputerEase Unveils New Web-Based Solutions for its Award-Winning FieldEase Construction Software

The FieldEase iSeries enables 'Anytime, Anywhere' construction management using the iPad, iPhone, Android operating system or any other device with Internet access.

CINCINNATI, Ohio — August 1, 2011: ComputerEase Software, Inc., a leading provider of construction accounting, project management and mobile field-to-office software has unveiled new Web-based solutions for its award-winning FieldEase construction management software. The FieldEase iSeries takes mobile computing to a new level by allowing project managers and other authorized personnel to input daily log entries, enter timesheet hours and update job information using Internet-enabled devices like smart phones, the Apple iPad, tablet PCs, laptops and Mac computers.

The FieldEase iSeries combines the power of FieldEase with the convenience of the Internet to provide 'Anytime, Anywhere' access to ComputerEase construction software data. This allows busy project managers to be more productive because they have greater freedom to do their jobs - from the office, on the job site, while traveling and even from home. Since data can be entered and accessed from any Web browser, the FieldEase iSeries provides real-time collaboration among the entire project team, including owners, field staff, estimators and office personnel.

FieldEase is an award-winning suite of mobile field-to-office applications that integrate with ComputerEase to transform traditional paper-based processes into paperless transactions. Standard FieldEase applications, which are accessed using a tablet PC or notebook computer, include Work Orders, Electronic Timesheets, Document Routing and Purchase Orders. "The iSeries expands the core FieldEase functionality by making certain functions available via the Web in a cloud computing environment," said John Meibers. "The versatility of FieldEase and the iSeries delivers freedom, speed and agility to a contractor's daily workflow."

For nearly 30 years, ComputerEase has been providing the construction industry with integrated project management and construction accounting software that simplifies the business end of construction project management. The development of cutting-edge technology, like FieldEase and the iSeries, that is also easy to use is why more than 6,000 construction companies use ComputerEase to manage their day-to-day operations.
